

	Ref	05612
	Machine	AUTOMATIC LATHE
	Brand	UNAMUNO
	Model	TA-16C

Main Technical Data

<ul style="list-style-type: none"> ➤ Round capacity to ➤ Hexagonal capacity to ➤ Main axis speed ➤ Camshaft capacity ➤ Maximum pieces length ➤ Turning length ➤ Drill length ➤ Workpieces number ➤ Interior / Ourter thread capacity ➤ Thread capacity with milling cutter 	<ul style="list-style-type: none"> 16 mm 14 mm 1.200-7.000 rpm. 4-82 pieces/min 220 mm 35 mm 35 mm 6 M-6 M-10

Others specifications:

- Base with easy access doors for manipulation of the cooling tank with electropump and transmission system for cycles and speeds of the main shaft.
- Stabilized perlitic nodular cast iron head, achieving a structure of máximo rigidity against bending and torsion forces.
- Camshaft located above machining position, protected against shavings.
- Machining tolos: It has three radial and three axial.
- Aplications: Designed for the manufacture of small partas that demand great production and precision.

Optional equipment:

- Manual and automatic feeders.
- Miscellaneous devices, for knurling, turning, threading, etc. : To be agreed.
